Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech (ME)	National Institute Of Technology, Agartala	6.60	2023 - 2027
Senior Secondary	Kendriya Vidyalay Kunjaban No.1 Agartala (CBSE Board)	72.6%	2022 - 2023
Secondary	Kendriya Vidyalay Kunjaban No.1 Agartala (CBSE Board)	96.2%	2020 - 2021

Experience

- **LFX Mentorship Term 3, 2026** *Remote*
  jaegertracing · Mentor Sep 2026 - Present
  – Project: OpenTelemetry-Native Query and State Layers Migration
  – I am guiding the mentee through project development, code reviews, and technical decisions.
- **LFX Mentorship Term 1, 2026** *Remote*
  jaegertracing · Mentee Mar 2026 - May 2026
  – Upgrade react-router-dom to v7 and Remove history package.
  – Helped on the UI integration for AI-Powered Trace Analysis with Local LLM Support.
  – Promoted to **Jaeger organization member** and joined the **jaeger-triage** team after successful mentorship completion.

Open Source Contributions

- **Twenty**
  Contributor
  – Contributed to the **twentyhq/twenty**
  – Fixed critical UI and data consistency issues including incorrect record counts, Firefox import validation screen failures, and timeline relation field updates.
  – Improved platform security by preventing admin self-impersonation and strengthening permission handling.
- **Kestra**
  Contributor
  – Contributed to the **kestra-io/blueprints**
  – Added a container image size regression guard blueprint, improving regression detection for container image sizes.
  – Added a Postgres SCD Type 2 customer dimension blueprint.
  – Added an AI GitHub issue duplicate detector blueprint.
- **Jaeger**
  Contributor
  – Contributed to **jaegertracing/jaeger-ui**
  – Migrated multiple components to modern React functional architecture.
  – Replaced legacy routing (history) with navigate across the codebase.
  – Performed refactoring, bug fixes, and dependency upgrades for stability.

Projects

- **PaperLite** *Github*
  A lightweight real-time collaborative document editor
  – **Tools & technologies used**: React, Vite, Quill, Material UI, Node.js, Socket.IO
  – Built a lightweight real-time collaborative document editor where multiple users can edit the same document simultaneously with live text synchronization.
  – Implemented bidirectional real-time updates using Socket.IO and Quill deltas.
- **Secure API** *Github*
  An Express REST API with JWT auth and RBAC.
  – **Tools & technologies used**: TypeScript, Express, MongoDB, Mongoose, JWT, bcrypt
  – Built a REST API with JWT cookie sessions for signup, login, and logout, hashing passwords with bcrypt.
  – Implemented role-based access control (`admin`, `creator`, `visitor`) to protect book create, update, and delete routes.

Technical Skills

– **Languages:** JavaScript, TypeScript, SQL
– **Frontend:** React, Redux, Zustand, TanStack Query, React Testing Library
– **Backend:** Node.js, Express.js
– **Databases:** MongoDB, Redis, SQLite
– **Infrastructure & Tools:** Docker, Git, Postman
– **Fundamentals:** Object-Oriented Programming, Operating System, Distributed Tracing, Data Structures & Algorithms
